Your ambition. Our passion.

## Service and maintenance program for customer-owned test equipment

Kitron offers a service and maintenance program for customer-owned test equipment to secure stable test systems and on-time product deliveries.

The following programs are available:

### Standard annual maintenance program

- ▶ Visual inspection of testbed needles, connectors, cables, etc.
- ▶ Cleaning / vacuuming
- ▶ Perform test with golden UUT to verify test system operation
- ▶ Documents generated: Maintenance report with findings

### Extended maintenance program

- ▶ Includes all operations listed in the standard program
- ▶ Replacement of worn out testbed needles, cables and connectors
- ▶ Test system analysis (software and hardware operation)
- ▶ Statistical analysis of one year's production test data
- ▶ Documents generated: Measurement system analysis report
- ▶ Maintenance and improvements report

Note: Material cost is not included in the programs

### Benefits:

- ▶ Regular system and maintenance check
- ▶ Secures uptime and stable test systems
- ▶ Reduced risk for unexpected breakdowns
- ▶ Predictable maintenance cost
- ▶ Maintenance performed by trained and qualified personnel
